

## Saturday Club

### **About us**

SaturdayClub started in 2012 with the intention of dressing young people who are engaged with their culture and the environment, creates a casual yet cosmopolitan style. To meet their needs, SaturdayClub takes the latest global trends, mixing them with street influences and in the most fashionable clubs, and reworks them into comfortable and easy to wear garments, always at the best prices. SaturdayClub evolves at the modern pace, always curious for new technologies, social movements and the latest artistic or musical happenings; aspiring to creating new products every week.

### **Our Views on HR**

We believe strongly in injecting young talent into our company, as they offer a fresh perspective about the latest happenings around the world. Most of our full time staff came through the route of having a part time working experience with us, whereby both parties have built up a strong understanding and expectations of each other.

### **Student's Feedback**

We enjoyed our internship as the team at SaturdayClub were approachable and willing to guide us.

We have gained essential skills for our future career prospects. Changes are very quick in the e-commerce world and being adaptive is important to thrive in such an environment. This experience has certainly piqued our interest in pursuing a career in marketing and ecommerce.

### **Collaborations with IHLs**

We organized a study tour to our design studio for year 3 students from Temasek Polytechnic School of Design.
