

## The Balance Co.

### **About us**

The Balance Co. sells modern ergonomic shoes that promote good posture. Our shoes are designed to promote good posture and a natural spine alignment with a stable arch support and acupressure massage points so that you can walk for the whole day without having any pain. The shoes are also extremely lightweight and comfortable with a contemporary style that goes with any outfit.

### **Our Views on HR**

Every intern has a dedicated mentor who will take care of the intern's personal wellbeing at work and tracks his/her career development progress. Every intern is given the option to choose from a variety of job scope based on his/her own interest, passion and potential. We try our best to develop the potential in each intern fully by helping them explore their interests, providing instant feedback and training their professional skills.

### **Student's Feedback**

Our interns felt that this is the best internship they have ever had because they are given opportunities to explore and execute their own ideas and they enjoy working in a fast paced environment.

### **Collaborations with IHLs**

We published our internships position in school forums and work closely with IHLs to find suitable interns.
