About US

We started our business in 2015 as mobile tailors specializing in professional business and providing our clients with convenience. Today, we have 2 mobile tailoring showroom and a physical showroom. Our clientele includes personal clients as well as corporate clients; companies looking for smart professional wear for their staff or to look at creating a brand through their image.

Our Views About HR & Talent

We believe that our staff are our family and that personal growth and development is equally as important as job relevant training and knowledge. In planning the courses and skills to take for the year, we sit down with the staff to address both personal and professional growth.

Students' Feedback

Students who interned with us felt that being in a real-world environment has given them a different set of skills and a better understanding of their subjects. They enjoyed the involvement and being kept in the loop of all projects that we had taken on as well as planning for the future, and has a clearer understanding of the type of roles and the specialization they would like to take on in their future.

How have we collaborated with IHLs

Through the STP program, we have had our very first intern from Temasek Polytechnic whom we are looking to hire full time upon his graduation. The experience of mentoring an intern gave us an opportunity to understand what the younger generation is looking for in a company and the kind of environment that allows them to thrive.
